

ProjectSync Global

A \$0 startup cost group project management app for students worldwide.

Built with Supabase + Vanilla JS + Tailwind CSS. Deploy to Vercel for free.

Now supporting **6 languages** and **4 education levels** for students everywhere.

International Features

Feature	Details
 6 Languages	English, Bahasa Melayu, 中文, Español, 日本語, 한국어
 4 Education Levels	Middle School, High School, University, Self-Learner
 Auto Timezone	Detects user's timezone for accurate reminders
 School Detection	Auto-detects school from email domain
 Mobile-First	Works perfectly on any phone, anywhere

Files Included

File	Description
index.html	Complete internationalized frontend
app.js	Full app logic with i18n system
supabase_setup.sql	International database schema + RLS policies
vercel.json	Vercel deployment config
.gitignore	Git ignore rules
MACOS_DEPLOY_GUIDE.md	Step-by-step macOS deployment guide

Setup Instructions

Step 1: Create Supabase Project

1. Go to supabase.com and sign up (free, no credit card)
2. Click “**New Project**”
3. Name it: projectsync
4. Choose region closest to your users (Singapore for Asia, US East for Americas, EU West for Europe)
5. Password: Generate a strong one and save it
6. Wait ~2 minutes for provisioning

Step 2: Run the Database Schema

1. In your Supabase dashboard, go to **SQL Editor** (left sidebar)

2. Click “**New query**”
3. Copy ALL content from `supabase_setup.sql`
4. Paste and click “**Run**”
5.  All tables, policies, and triggers created

Step 3: Enable OAuth (Google Sign-In)

1. Go to **Authentication > Providers**
2. Find **Google** and toggle it **ON**
3. You’ll need a Google OAuth Client ID:
 - Go to [Google Cloud Console](#)
 - Create a new project → APIs & Services → Credentials → Create OAuth 2.0 Client ID
 - Application type: **Web application**
 - Authorized redirect URI: `https://YOUR_PROJECT_ID.supabase.co/auth/v1/callback`
 - Copy the **Client ID** and **Client Secret** into Supabase
4. Save

Step 4: Set Up Storage Bucket

1. Go to **Storage > New Bucket**
2. Name: `project-files`
3. Toggle **Public bucket** ON
4. Click **Create bucket**
5. Go to **Policies** tab and add:
 - **INSERT:** `auth.role() = 'authenticated'`
 - **SELECT:** `true`
 - **DELETE:** `(storage.foldername(name))[1] = auth.uid()::text`

Step 5: Configure Your App Credentials

Open `app.js` and replace these two lines at the top:

```
const SUPABASE_URL = 'https://YOUR_PROJECT_ID.supabase.co';  
const SUPABASE_ANON_KEY = 'YOUR_ANON_KEY_HERE';
```

Find your credentials:

- **Project URL:** Supabase Dashboard > Settings > API > Project URL
- **Anon Key:** Supabase Dashboard > Settings > API > anon public key (starts with `eyJ...`)

Step 6: Deploy to Vercel

Follow the detailed guide in `MACOS_DEPLOY_GUIDE.md` or:

Quick version:

```
cd ~/Downloads/projectsync # or wherever your files are  
git init  
git add .  
git commit -m "Initial ProjectSync Global commit"  
# Create repo on GitHub, then:  
git remote add origin https://github.com/YOUR_USERNAME/projectsync.git
```

```
git branch -M main
git push -u origin main
# Then import on vercel.com
```

Step 7: Update Supabase URLs

1. In Supabase Dashboard, go to **Authentication > URL Configuration**
2. Add your Vercel URL:
 - **Site URL:** `https://your-projectsync.vercel.app`
 - **Redirect URLs:** `https://your-projectsync.vercel.app/**`

Supabase Free Tier Limits (2026)

Your app runs on **\$0/month** with these generous limits cite web_search:22#0 web_search:22#2 :

What You Get	Limit	Your Reality
Database	500 MB	~5-10 MB for 100 school projects
Auth Users	50,000/month	Your entire school + neighbors
File Storage	1 GB	~500-1,000 PDFs/images
API Requests	Unlimited	Never worry about reads/writes cite web_search:22#3 web_search:22#6
Edge Functions	500,000/mo	Plenty for notification cron
Projects	2 active	You need 1

 **Note:** Free projects auto-pause after 7 days of inactivity. Set up a free cron ping or upgrade to Pro (\$25/mo) when you have paying users.

Next Steps After Deploy

1. **Test it yourself:** Create a project, add tasks, invite a friend
2. **Share globally:** Post on Reddit (r/ApplyingToCollege, r/students), TikTok, Twitter/X
3. **Get feedback:** Ask international students to try it
4. **Iterate:** Add features based on what they ask for
5. **Monetize:** When you have 100+ active users, add Stripe for Pro tier (\$3/month)

Future Features

- Real-time collaboration (Supabase Realtime)
- Comments on tasks
- Due date calendar view
- Export to PDF/Excel
- Dark mode
- More languages (French, German, Arabic, Hindi)
- AI task breakdown

- Teacher dashboard
- Grades/feedback system

Built with ❤️ by a student, for students worldwide.
